

INSURE YOUR
FUTURE HEALTH

Radox Health is a specialised health service launched in 2010 by Dr Fitzgerald, originating from Global Diagnostics Leader Radox, after over 35 years of research and development within the scientific industry.

Our world-leading science and technology used to assess overall health and the internal workings of the whole body, allows us to diagnose and prevent future illnesses – the science needed for saving lives!

Radox Health has been at the forefront of private and preventive healthcare for the last 7 years, allowing the public to benefit from Radox products; in particular our Preventive Health Programmes which measure blood samples through the use of the world's first and only patented biochip array technology, making us unique in our field!

Our Preventive Health Programmes allow health problems to become a thing of the past, making way for peace of mind and a healthier you! We offer 3 programmes which are tailored to suit your needs allowing your results to be as extensive as you want them to be.

SIGNATURE

Ultimate Wellbeing. For lifelong health, this is the best possible way to prevent illness and take control of your body. ~350 biomarker tests, with unlimited and personalised access to experts and solutions, for ultimate health care.

EVERYMAN

The only Annual Men's Health Programme which actually continues to track and optimise your results throughout the year. With more tests than any other MOT to help you prevent thousands of illnesses in your future.

EVERYWOMAN

We ensure over 25 areas of your body are in optimal condition, by understanding your biomarkers, managing your wellbeing now and preventing health problems in your future.

Each programme in our portfolio includes a detailed analysis of your body, a personal health plan, track-up appointments and scientific consultations.

WHAT & DOES IT DO & HOW DOES IT WORK FOR YOU?

Over 25 different aspects of the body are assessed in scientific detail, which is designed to identify precursors and early signs of illness, before you experience symptoms or problems.

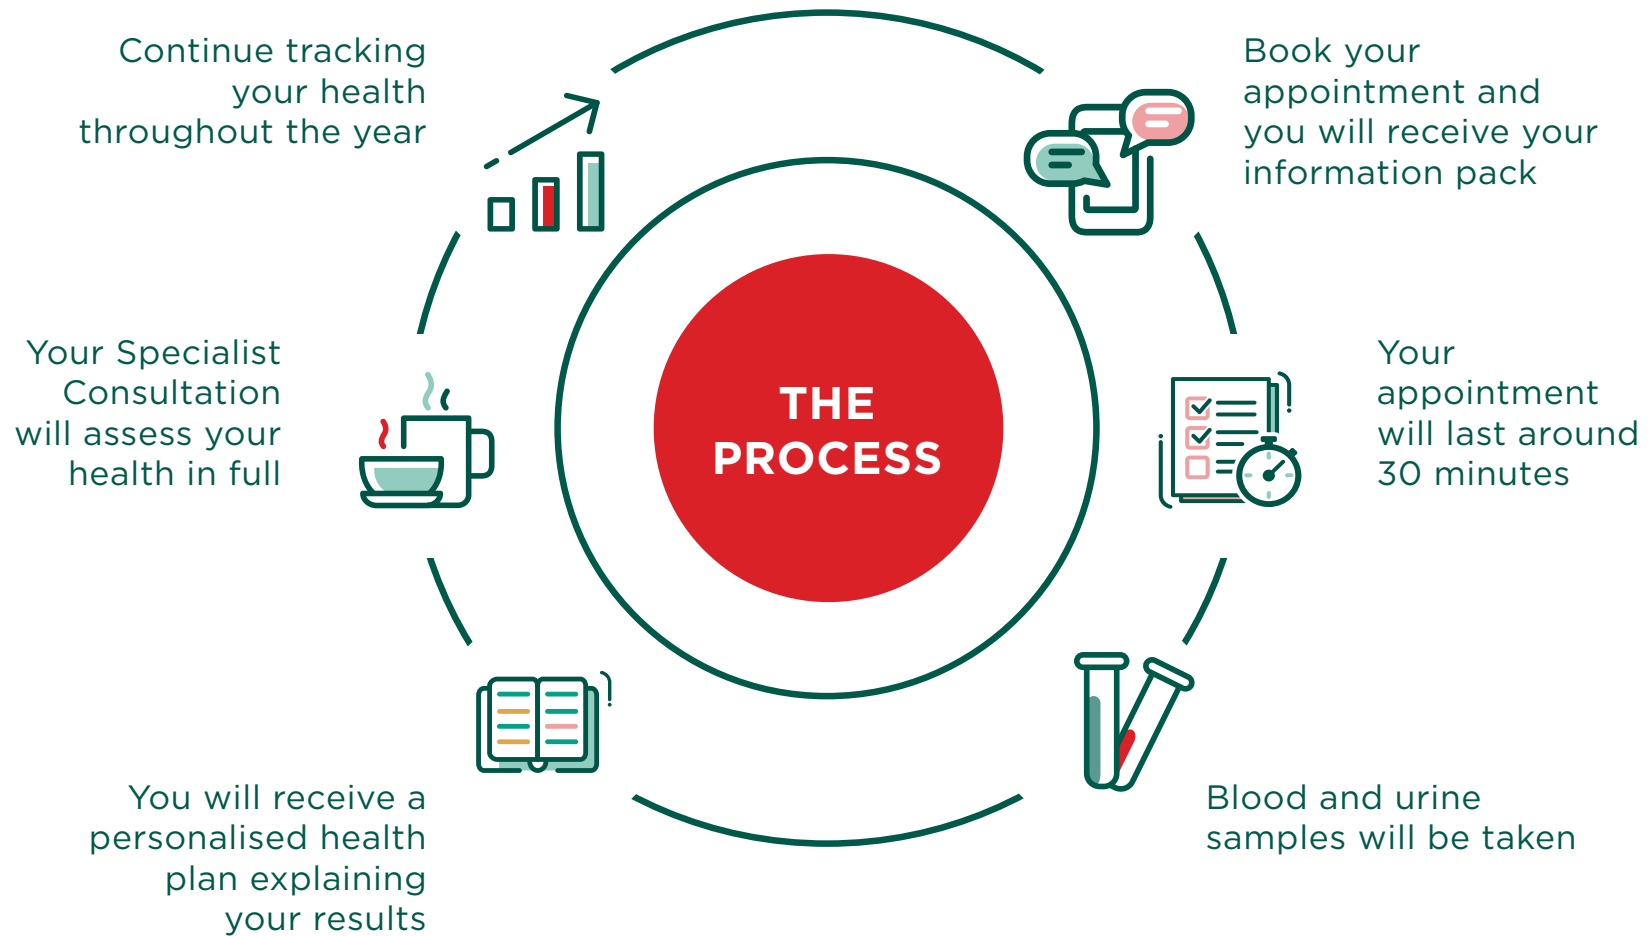

Radox Health measure more than any other standard “health check in the world today” with new tests being added on a regular basis.

Radox Health is designed to stop illnesses developing undetected. Hundreds of biomarkers are available for over 25 aspects of your wellbeing.

Radox are helping thousands of people across the country to harness the power of prevention and secure their health now and for their future.

Unlike any other health care; we don't wait until you are sick to make you better. We are constantly working to keep your entire body healthy.

"I had been doing quite a lot, I ran 20 miles the day before the test, followed by a yoga class to stretch out, and this was quite a common routine for me - some days I would also cycle to and from work and maybe go to a spin class. My Radox Health experience, has been a real eye opener for me, I guess I assumed I was doing all the right things for my health, but was actually damaging my body."

Simon Reeve
Marathon Runner

Alison Clarke
Businesswoman & wife
of Golfer Darren Clarke

"Honestly, I was nervous at first, it is the fear of the unknown, consciously taking the bull by the horns and putting yourself in the position to find out all about your own health was unnerving - but absolutely worth it. Since the check I have been working to improve my cholesterol and while life is busy, I have been taking time to take better care of myself.

Catherine Pinkerton
Keen sportswoman

"It was a really great experience, all of the tests provided were very beneficial, I was terrific to find out about my health in detail. Just a few things, such as my iron were slightly out, overall I'm in good health, so now I have real peace of mind, that I don't have to worry. I work hard at my health, eating well and training - this year I'm running the London Marathon, which will be my fifth! I'd advise any and everyone to get checked out by Radox Health

The Radox Health specialist was brilliant; she explained exactly what was happening and what each test was for. The whole experience lasted around 40 minutes and was very easy to fit into my busy week. When my results came back my Radox health specialist took me through each in detail. Thankfully I am reasonably healthy! The only slight area of concern was that my cholesterol was a touch high.

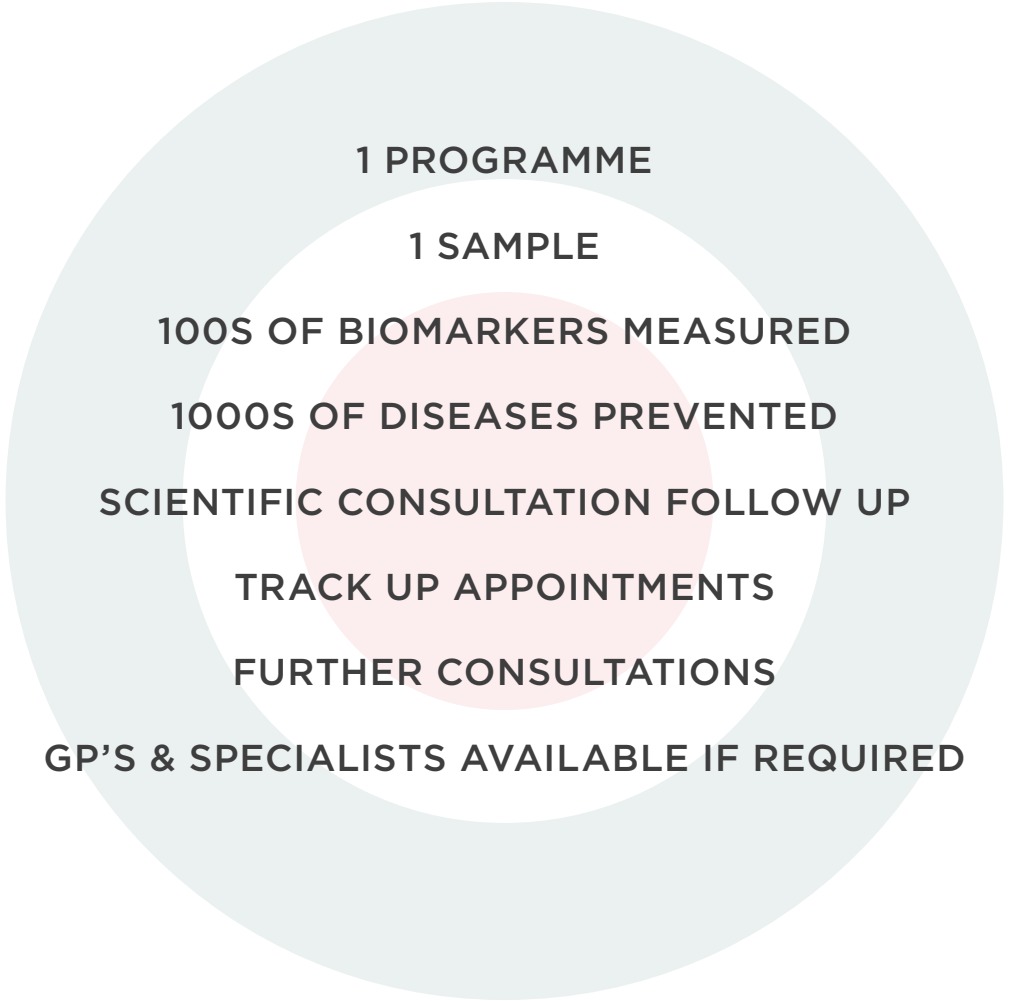

ANNE HANNAN
MARIE CURIE CANCER
CARE

"My full blood picture showed that my body was still recovering from pregnancy. It proved to me that it really does take a long time for a woman's body to totally recover from carrying a baby for nine months. And, how were my lungs after years of smoking? Not great is the answer. My lung function is not what it should be and showed clear signs of deterioration. On the plus side, every other part of my body is in tip top shape which I am really delighted about, everything from BMI to kidney and liver.

Tara O'Dornan
Journalist - Sunday Life

DWAINE VANCE
Fitness Guru

The majority of the test results were within normal ranges, but I gained an excellent insight into my overall health. With my dietary and lifestyle changes I hope to remain fit and active for the years to follow. I would recommend a comprehensive Radox health check on an annual basis to get the best out of a healthy life.

BOOKINGS
